Dr. Ash Thakker, CEO is invited by NASA Technology Transfer meeting for a lunch keynote address

Dr. Ash Thakker, CEO is invited by NASA Technology Transfer meeting for a lunch keynote address. The purpose of this meeting was to teach small business how to fund the development of new products or technologies through the Small Business Innovation Research & Small Business Technology Transfer Programs. SBIR and STTR are legislated federal research & development test-aside for small high-technology firms. This is an effective way through which government can use the innovation & efficiency of small high-technology firms and research institutions to accomplish various NASA missions. It is also an opportunity for small, high-technology companies and research institutions to participate in government R & D program. The partners in STTR can be:

- Universities
- Not-for-Profit R & D firms
- Federally funded research and development centers.
